### **RESOLUTION**

The 15th January, 2022

Drug Trafficking and Drug Abuse are global phenomenon. No part of the world is unaffected by it. In recent times, the advancements in Information technology have inadvertently added to the complexity of the problem. The Internet — both surface net and dark net are unsuspecting allies of the traffickers as they are used both for procurement as well as trafficking of drugs, some of which are extremely potent in very small quantities. Use of encrypted technology (WhatsApp, Wickr, etc.) and anonymising technology (VPNs), along with cryptocurrency have made transactions in drugs, difficult to intercept.

2. As per World Drug Report 2021, published by UNODC, "Drugs killed almost half a million people in 2019 while drug use disorders resulted in 18 million years pf hbalthy life lost.... Over the past year, around 275 million people have used drugs, up by 22 per cent from 2010." Extent of drug abuse in India has increased as brought out in "Magnitude of Substance Use in India 2019", a report published by Ministry of Social Justice & Empowerment.
